CHILSON'S IMPROVED CONE FURNACE.

Patented in the United States, England and France.

Ten Sizes for Brick and Portable Casings.

A GOLD MEDAL was awarded to this celebrated Furnace, at a recent Fair of the Massachusetts Charitable Mechanic Association, and the ONLY GOLD medal ever awarded any Furnace by this Association. It has also received another GOLD MEDAL (first premium), at the Middlesex Mechanics' Exhibition, at Lowell, 1867.

This justly celebrated Furnace, now in such extensive use throughout the country, is now in much greater demand than ever, since the recent improvements have been added.

Once seen it must convince every one that it is the most PERFECT plan for WARMING buildings in this country. Its *wonderful heating power*, and great *economy in FUEL* have been more fully developed the past two years during the high price of fuel than ever before — it having proved in many cases a saving of from *forty to fifty per cent* over other furnaces.

Thousands of commendations and references have been received from

UNION Mutual Life Insurance Co., OF MAINE.

Directors' Office, 27 Court St., Boston, Mass.

W. H. HOLLISTER, *Secretary.*

HENRY CROCKER, *President.*

ASSETS SIX MILLION DOLLARS.

HAS BEEN IN SUCCESSFUL OPERATION 22 YEARS.

It is a purely mutual company, having no stock, and is managed by the members for their own benefit.

It furnishes insurance at the least possible cost. Every dollar of its receipts, after paying the losses and expenses, and providing the necessary reserve, is returned to its members in annual dividends.

Its dividends are made on the contribution plan, by which the surplus to be returned is apportioned among the policies in the exact ratio of their contribution thereto. These dividends are made payable at the end of the second year, and annually thereafter, and may be applied to the reduction of premiums.

It makes all policies non-forfeitable. For the surrender of a plain life policy (requiring annual payments during life), while in force, a paid up policy for an equitable amount will be given. Limited payment life policies, and all endowment policies, are paid up policies for a proportional fractional part of the face of the policy. For instance, a ten year endowment policy for \$1,000, requiring ten payments, becomes, after one payment, a paid up policy for one tenth of its face, or \$100; after two payments, two tenths, or \$200. The insured under the limited payment policies issued by this company, therefore, gets exactly the amount of insurance he pays for, whether he makes few or many payments.

Having been organized in 1849, it has been in successful operation twenty-two years, during which it has accumulated assets amounting to nearly \$6,000,000, besides paying its losses and returning large dividends to its members. Its investments earn an interest revenue more than sufficient to pay its accruing losses or its working expenses.

It is economically managed. The ratio of its expenses to its income, for the year 1870, was but 12.81 per cent. Its risks have been selected with great care, as shown by the fact that in the 21st year of its existence, 1870, the ratio of losses to income was but 14.65 per cent. In the practice of Life Insurance the expenses and losses are paid by a yearly assessment upon each premium, and the remainder of such premium, after deducting this assessment and the necessary reserve, is placed to the credit of the policy-holder, and either retained by the company, drawing compound interest, or returned to him in dividends. It follows, therefore, that that company whose expenses and losses are the least, is the most advantageous to the member. The percentages of these, as will be seen by a comparison with the statements of other companies, are not only lower than the average of all other companies, but less than those of any company of equal age.

It issues all kinds of policies at low rates of premium, grants its members the largest liberty consistent with prudence and safety, and promptly adjusts and pays its losses.

PREFACE.

THE Second Number of the WALTHAM and WATERTOWN DIRECTORY is herewith presented to our patrons and the public.

We have done everything that experience could suggest to issue a correct and reliable guide to the citizens, business, societies, etc., in both towns.

The large increase in names over the last edition is an evidence of prosperity and of a steady but sure growth; more especially is this observable in Waltham, as will be seen by referring to our advertising department.

With many thanks to all who have aided us, we remain

Yours, &c.,

GREENOUGH, JONES & CO.

THE UNION WHETSTONES

—AND—

OIL-STONES

Are Guaranteed Superior to any other,

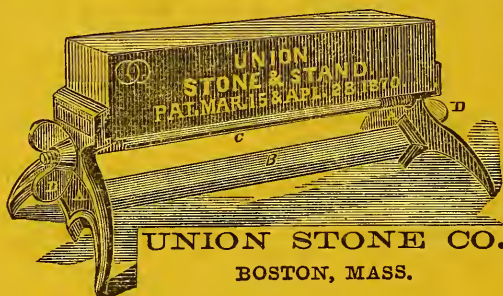

—FOR—

SHARPENING EDGE TOOLS, KNIVES, &c.

EVERY

Housekeeper,

Carpenter,

Shoemaker,

AND

Machinist,

Should have a UNION STONE, mounted in
the Patent OIL-STONE HOLDER.

Price of Holder, 25 cents. Price of Stone, 60 cents.

Price of Stone and Holder, 75 cents.

The UNION Stones are made in various degrees of fineness and hardness, to suit all trades. A number is attached to each Stone to designate the use for which it is intended, as explained below. The same number indicates the same quality in all cases.

Nos. 24 and 36 are for cleaning castings and other rough work. 24 is a little coarser than 36. No. 61 is for sharpening machinists' tools, and will do it as rapidly as an ordinary grindstone. In finishing metals it is equal to the second-cut file.

No. 80 is for sharpening carpenters' and wood-workers' tools, in place of a grindstone. It is invaluable for outside jobs, where a grindstone is not available.

In finishing metals it is equal to smooth-cut files.

No. 100 is designed especially for household use, and mounted on the Patent Oil-Stone Stand, will be found cheaper and superior to the family grindstone.

It will give a rough edge about right for shoe tools.

No. 120 is for whetting carpenters' and other tools, and will produce a fine edge.

It is equal to dead smooth-cut files, for fine finish.

F. F. will produce a very keen, fine edge, is an excellent razor hone, and is superior to emery sticks, paper, or crocus cloth, for polishing metals.

FOR SALE AT THE PRINCIPAL HARDWARE AND TOOL STORES.
